

	Input	Process	Output	Contribution
Systematic Literature Review	Conference Papers Articles	Conduct literature review with guidelines suggested by Boland et al.	Understanding of state-of-the-art adaptations for subtitled media and the challenges faced for specific communities of focus when consuming media	Survey Contribution - a taxonomy for the types of subtitle adaptation against communities of focus
Interview with Speech and Language Therapists (SLTs)	Identified research gaps	Conduct semi-structured interview with SLTs	Understanding of how PWA consume subtitled media and current challenges they face	Empirical Contribution - draw up user requirements and design recommendations for subtitle adaptation from interview and survey
Survey with People with Aphasia (PWA)	SLTs PWA	Conduct survey with PWA		
Implementation of subtitle adaptation intervention	User Requirements Design Recommendations	Implementation of subtitle adaptation intervention, following insights gained from interview and survey	High-fidelity subtitle adaptation intervention	Artefact Contribution - novel system/interaction technique that is reusable across myriad situations of PWA consuming subtitled media
Testing and Evaluation of subtitle adaptation intervention	High-fidelity subtitle adaptation intervention PWA	Conduct usability testing against PWA Possible evaluation against Machine Learning metrics for specific features	Understanding of the change of PWA's overall experience of interacting with the subtitle adaptation intervention	Empirical Contribution - new insights about PWA's experience of consuming subtitled media
